## Summary

Implemented a CI/CD pipeline for a high-traffic web application, reducing deployment time from days to minutes and improving availability and scalability.

- Reduced AWS infrastructure costs implementing cost optimization strategies like rightsizing instances and using reserved instances.
- Automated the provisioning and management of AWS infrastructure using Terraform, reducing manual effort and increasing consistency and reliability.
- Implemented a disaster recovery solution for critical applications using AWS services like AWS Backup and AWS Disaster Recovery, ensuring business continuity in case of a disaster

Skills:

AWS

AWS Lambda

AWS IAM

AWS Cloudformation

DevOps

Terraform

AWS Storage

NAGIOS

DevOps Tools

DevOps Jenkins

Linux

Redhat Linux

Amazon Ec2

Centos

Windows Server

VMware Vsphere

Nginx

## Experience

### DevOps Engineer

QSOFT Solutions Pvt.Ltd

May 2021 - Present (2 years 5 months)

### IT Support Specialist

Tabsons India

Dec 2019 - May 2021 (1 year 6 months)

Configuration & installation of IRD

Troubleshooting on problems related to basic networking.

Perform server management and configuration (Dell server)

Supporting network for Client BARC (Broadcast Audience Research Council India)  
Performed wireless configuration changes, policy changes over Net gear.

## Education

### **Rajasthan Technical University**

b.tech, Network and System Administration/Administrator

2013 - 2017

## Skills

Amazon EC2 • Amazon S3 • DevOps • Git • AWS Lambda • AWS CloudFormation • AWS Identity and Access Management (AWS IAM) • VMware • RAID • VMware vSphere
